

## Application for Registration of Device or Solution

Devices and Solutions that have a valid Attestation of Compliance may be registered for use in Australia under the [IAC Device Approval Process](#).

Registered Devices are listed on the [Approved Devices List](#) published on AusPayNet's website.

To apply for registration of a device or solution, complete and submit this Application for Registration together with the PCI Attestation of Compliance to [PAG@auspaynet.com.au](mailto:PAG@auspaynet.com.au).

A Letter of Approval will be forwarded to the Device Approval Applicant and the device or solution listed on the Approved Devices List once the Application for Registration has been reviewed and the PCI Attestation of Compliance validated.
